Issue date: 01/01/26

Focus Areas		2026	2027	2028
Data	Data Dictionary	4209 DD Field Descriptions	301 Improve process for new DD elements	305 Add DD AI Search
	Enterprise Data Mgt	4195 Add DD Report Views	319 Implement DD Strategic Improvements	312 Dictionary health check
	Security & Identity	4196 Fuels Pricing APIs	334 Site Facilities Reporting API	327 Predictive Site Maintenance
Alt-Fuel	EV Charging	302 Sales Performance API	311 Consumer Authentication	313 Consumer Behaviour Analysis
	Hydrogen	337 Closed Loop API Security Updates		
		4206 EV Charging Payment Processes	333 Payment Data Updates for EVC	
Payment	Payments & Loyalty	4205 EV Pricing	308 H2 Wetstock Mgt	
	OEM In-Car Payments	329 Update P2F/H2H standards	328 POS-EPS API for IFSF	
		332 Closed Loop API Update 2	101 Open Loop payment API	
Mobility	Mobile Experience		201 Explore In-Car payments & loyalty	
	Reservation Services	331 Mobile Payment 2FA		
		206 Explore Advance Orders & Reservations	335 Implement Advance Orders & Res.	
APIs	API Test Tools	326 Pilot Manual Certification Process	336 Evaluate Automated Cert Tool	322 Develop Mobile API test simulator
	API Conversions	4211 LON API Converter		
		4220/1/2 Ways of Working Initiatives		
Communications		Enhance Ref Arch	Scan 2026	Scan 2026
			Roadmap Refresh	Roadmap Refresh
				Scan/Roadmap

Note: Ongoing Maintenance of existing standards not shown

IFSF 2026-28 Roadmap

Focus Areas			Focus Area Descriptions
Data	Data Dictionary	H	Improve adoption and value derived from the Joint IFSF/Conexus OpenRetailing Data Dictionary. Conduct a strategic review to clarify member needs.
	Enterprise Data Mgt	H	Enable advanced reporting, analysis and monitoring through new standard APIs from POS and forecourt devices, that feed cloud-based applications that maximise Retailer's business insights and support optimal decision making.
	Security & Identity	H	Maintain/augment good security and privacy practices across existing and new IFSF protocols and standards. Monitor the evolution of biometric ID capabilities.
Alt-Fuel	EV Charging	H	Work with partners to improve integration of EVC with retail site functions (payment, loyalty, pricing, reconciliation); Evaluate payment data updates to accommodate EVC.
	Hydrogen	L	Build new API integrations for Hydrogen Dispensers based on traditional fuels protocols.
Payment	Payments & Loyalty	H	Respond to evolving payment & loyalty demands by updating and creating new payment standards for new processes.
	OEM In-Car Payments	M	Monitor the evolution of mobile to OEM In-Car integrations and assess how existing digital payment, loyalty and CarWash APIs can be augmented to take account for these OEM integrations.
Mobility	Mobile Experience	H	Evolve existing integration standards to accommodate consumer mobile preferences including expected adoption of touchless (voice initiated) transactions.
	Reservation Services	M	Monitor the evolution of reservation services e.g. parking, scooters, food pick-up etc, to determine whether interactions with forecourt systems justify new standards.
APIs	API Test Tools	H	Continue to evolve testing tools in line with member survey feedback including creation of an API certification tool.
	API Conversions	M	Continue to selectively upgrade legacy standards to APIs, based on agreed value criteria and where technology evolution (eg. Cloud POS) drives vendors to make product changes.
Communications			Clearly articulate IFSF strategic plans and forthcoming initiatives to members and prospective members. Illustrate where standards and software tools apply.

Focus Areas

2025

2026

2027

Alt-Fuel	EV Charging	H L	4206 EV Charging Payment Processes	333 Payment Data Updates for EVC	
	Hydrogen		4205 EV Pricing		308 H2 Wetstock Mgt

#	Priority	Initiative Title	Initiative Description & Progress Made (if underway)
4206	1	EV Charging Payment Processes	Continued/ongoing engagement with org's to influence EV payment processes, building on white paper created in 2024. Extend to include analysis of 'Plug & Charge' payments, collaborating with OCA, EVRoaming/EMV. Augment white paper to include changes to POS-EPS std resulting from the OCPI std (covers site-CSMS integrations).
4205	1	EV Pricing	Develop a White Paper to clarify the business model and lay out the proposed development of EV Pricing standards. Work with OCA/EV Roaming on the EV charging elements of the paper.
333	2	Payment data updates for EVC	Add fields to POS-FEP and FEP-Host payment standards to accommodate EV charging requirements (eg. EVSE id).
308	5	H2 Wetstock Mgt	Continue to evolve the H2 stds such as tank gauge / wetstock mgt

Note: Ongoing Maintenance of existing standards not shown

IFSF 2025-27 Roadmap

Issue date: 01/01/26

Focus Areas

2025

2026

2027

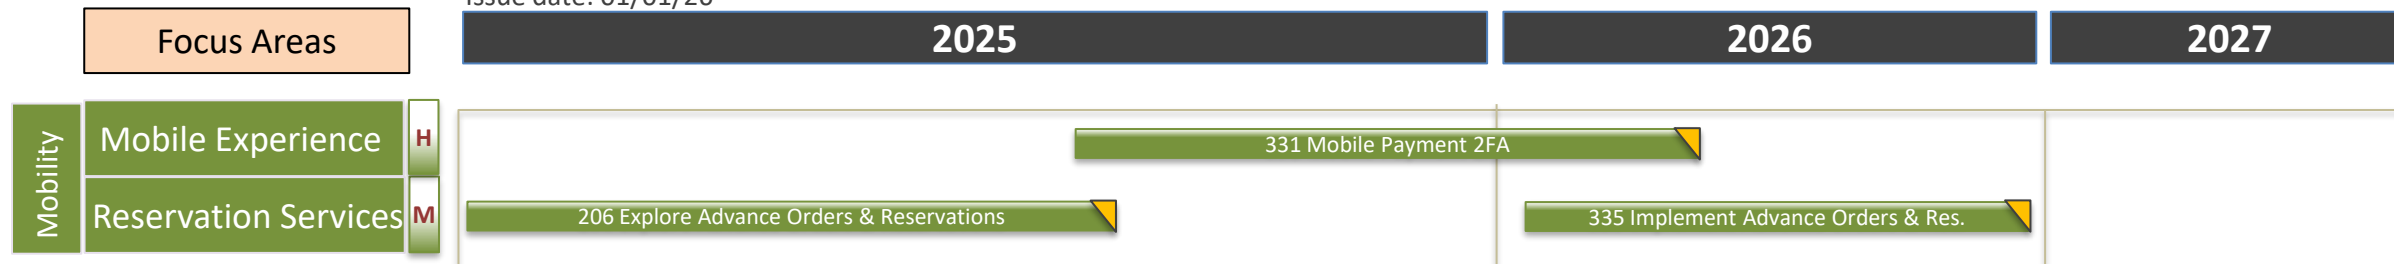

#	Priority	Initiative Title	Initiative Description & Progress Made (if underway)
101	2	Open loop payment API	Extend closed loop payment API to support scheme cards.
328	2	POS-EPS API for IFSF	Make updates to the POS-EPS API standard to make it more compatible with the IFSF POS-EPS XML standard. Develop an implementation/migration guide for IFSF members to guide them through the transition.
329	2	Update P2F/H2H standards	Update P2F/H2H standards: 1) with addition fields to support scheme requirement for transaction linking e.g. to link pre-auths with advices, refunds to financial requests etc; 2) Update existing payment standards to clarify the use of fields to define service type e.g. self-service, unattended vending machine etc and add additional codes or fields where needed.
332	2	Closed Loop API Update 2	Continue to evolve this relatively new standard in line with member's needs
201	3	Explore In-Car payments & loyalty stds	Investigate In-car payment and loyalty requirements in light of emerging OEM connected car solutions. Perform a gap analysis to evaluate whether existing mobile payment standards can fulfill these requirements. Develop relevant use cases to clarify work required to close gaps in standards.

Note: Ongoing Maintenance of existing standards not shown

Issue date: 01/01/26

#	Priority	Initiative Title	Initiative Description & Progress Made (if underway)
331	2	Extend 2FA API to mobile payment use cases	Consistent with initiative 4207, extend coverage of 2FA to include mobile payment transactions.
206	3	Explore Advance Ordering & Reservation Services	Develop a White Paper to clarify the business scenarios and high-level requirements of Advance Ordering and Reservation Services standards. Build on work already done with MPPA v2.1 standard and aim to include bay availability and reservation functions in scope. Consider also the impact of cloud platforms on mobile services. Use White Paper to support consultation with other standards bodies to evaluate their existing standards and whether they meet the need. Evaluate also whether existing OpenRetailing standards can be extended to accommodate order fulfillment functions and in-car CW services.
335	4	Implement Advance Ordering and Reservation Services	Implement standards updates identified in White Paper developed through initiative 206.

Note: Ongoing Maintenance of existing standards not shown

Focus Areas

2025

2026

2027

APIs	API Test Tools	H	326 Pilot Manual Certification Process	336 Evaluate Automated Cert Tool	322 Develop Mobile API test simulator	
	API Conversions	M	4211 LON API Converter			

#	Priority	Initiative Title	Initiative Description & Progress Made (if underway)
4211	1	LON API Converter	Evaluate the business case for creation of a LON converter for vendors to adopt to assist in the transition to API standards.
326	2	Pilot manual certification process	Work with Connexus and partner ThinkSys to pilot manual certification using Mob Payment API test certification process developed by ThinkSys.
336	2	Evaluate developing an automated certification tool	On successful completion of pilot initiative 326, implement an automated tool to handle certifications where justified (demand/complexity).
322	3	Develop Mobile v2.0 test simulator	Based on member survey feedback, add a simulator to cover the new v2.0 MPPA mobile standard. Consider using ThinkSys as alternative author.

Note: Ongoing Maintenance of existing standards not shown
